

I am a little tiny piece of the earth
none-the-less important
and special
and there is no-one else like me,
unique and whole

You are a little tiny piece of the earth
none-the-less important
and special
and there is no-one else like you,
unique and whole

Lets go climbing, life's a beautiful tree
Share its branches with the honey-bees
Nature is living in you and me
Climb back down and its easy to see...

We are little tiny pieces of the earth
none-the-less important
and special
and there is no-one else like us,
unique and whole

I love every single piece of the earth

And it's all important

and special

and there is no-where else to be,

unique and whole

Lets go diving in the briny sea

Swimming with the fishes and the manatee

There's a whole lot of water in you and me

Climb back out and its easy to see...

We are little tiny pieces of the earth

none-the-less important

and special

and there is no-one else like us,

unique and whole

Unique and whole

Unique and whole
