

Ali loves everything living

8 legs 6 4 2 or none

spiders made webs in her knee pits

she hops til their weavings done

Ali won't ever use bug spray

She says everything should live

Nothing is really ugly

It's just how you look at it

But did I mention there's one question

Keeps her up all night

The mosquito though not her foe

Stirs another part of her through bites

Love you love you love you love you love you love you splat

Love you love you love you love you love you love you splat

Love you love you love you love you love you love you splat

Ali feels sorry for veges

Cuts them with a tearful eye

Even thinks nits should roam free

But maybe on some other guy

But did I mention there's one question

Keeps her up all night

The mosquito though not her foe

Stirs another part of her through bites

Love you love you love you love you love you love you splat

Love you love you love you love you love you love you splat

Love you love you love you love you love you love you splat
